ArduPlane SITL — Roll multisine — 50 Hz publication

Normalized excitation

Requested roll
Firmware applied logical excitation

Applied ΔPWM (µs)

roll: final − baseline
pitch: final − baseline
yaw: final − baseline

Body rate (rad/s)

p (roll)
q (pitch)
r (yaw)

Roll change (deg)

Roll

Time since first enabled command (s)

Only the named axis is commanded. GUIDED remains active; response includes nominal motion and cross-axis coupling.
